■ RECOMMENDATIONS

- Clean the skin, remove any make-up, treating cream or sun lotion.
- Perform a Visia Consultation before any aesthetic treatment.
- Perform a Visia Consultation 4 to 6 weeks later to evaluate the results of the curative treatment.
- Perform a Visia Consultation every 3 months to follow the results of the preventive treatment.

VISIA

Complete System for Photography and Electronic Documentation

The ideal tool for treatment coordinators, aestheticians, nurses and doctors!

■ Complete System for Photography and Electronic Documentation

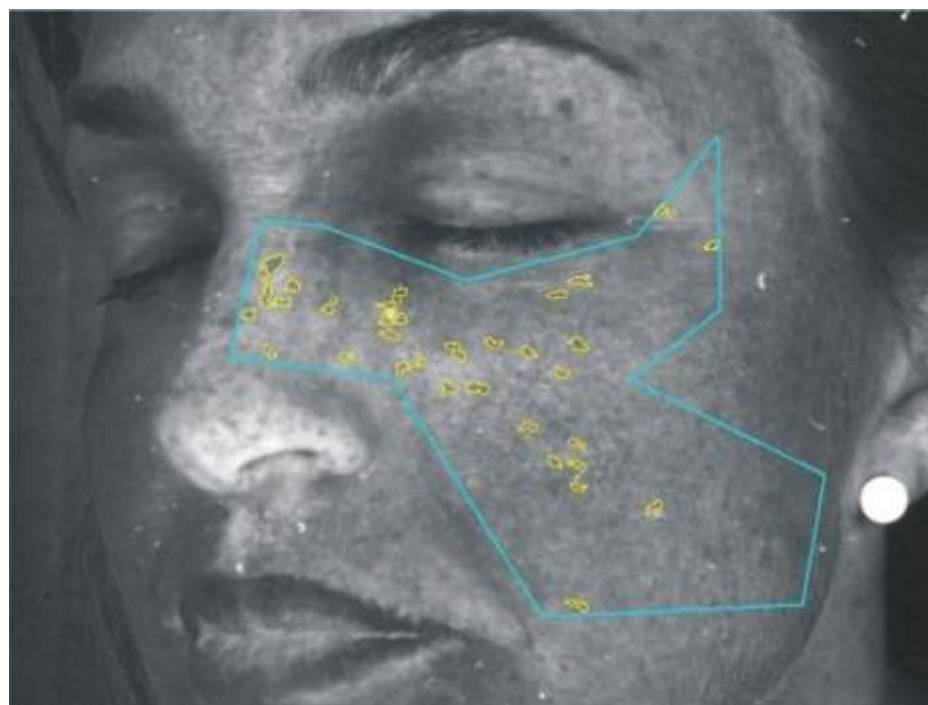

Seven features in one unit:

- Electronic documentation and management of customer
- Digital photography under natural and UV light
- Automatic analysis of skin
- Statistical comparison with a reference group
- Comparable charts: picture opportunity
- Personalized treatments
- Printing of the general assessment for the customer... (products and services)

Visia delivers a statistical analysis for each skin condition

Using UV light, the Visia reveals the spots and the premature aging (telangiectasia, wrinkles, spots, etc).

In UV light , Visia can detect the sunspots in advance!

Pore analysis

UV Spots analysis

Patient positioning in visia

Evenness analysis

General assessment

■ **ADVANTAGES**

For each of seven skin conditions:

- Pores
- Telangiectasia
- Wrinkles
- UV spots
- Evenness
- Porphyrins
- Spots

- Visia compares your client to a pre-existing database of 3500 real cases recorded in 8 countries across the world.
- Visia makes it possible to list products and services to prescribe your clients what they need.
- Print the general assessment (recommendations and photographs) and offer it to your patient /customer. Now he/she understands their skin and you have proven to your client the treatment works!
- Compare the photographs taken of one consultation and view the progress made from the treatments.

Increase your sales in products and services!
